

OREGON GAME PROJECT CHALLENGE

What Is It?

Creating computer games requires skill in programming, art, sound and music, game design, and project management. OGPC provides an opportunity for middle and high school aged students to develop and show off those skills by working in teams to create games.

How Does It Work?

This year's theme is **Space Race**. Teams are at work creating a game that explores this theme. On April 8th, teams will gather at Western Oregon University and students will present their projects to other teams, judges, and industry professionals at the OGPC Main Event.

APRIL 8TH
Western Oregon University

Get Involved:

The Main Event (including workshops) is free and open to the public. Come check out the amazing games created by Oregon's youth. It is also not too late to get involved as a volunteer or sponsor. Find out how at:
